Product Description

This Centerstore indirect unvented hot water cylinder with a 210 litre capacity is a purpose designed unvented water heater and is an ideal option for either updating an old system or for new build projects. This high quality, energy efficient unvented cylinder will stand the test of time thanks to its stainless steel inner vessel which makes it highly resistant to corrosion. Plus, the outer casing of the cylinder is a combination of resilient thermoplastic moulding and a plastic coated corrosion-proof steel sheet. This indirect unvented hot water cylinder will provide your customers with a boosted shower performance and faster filling baths, and also features an immersion back up heater. What's more, your customers can tailor the cylinder's capacity according to their needs – from 120 to 300 litres – so the size of the property will not affect performance. The cylinder is very affordable to run and also has low carbon emissions which makes it the ideal water heating solution for energy-conscious customers. What's more, this cylinder will also give a consistently good heat loss performance thanks to its CFC-free polyurethane foam insulation. This Centerstore indirect unvented hot water cylinder is both excellent quality and value and includes an outstanding 25-year cylinder leak guarantee and a 2-year guarantee on all other parts, so it truly ticks all the boxes. Buy online at Plumb Center today and benefit from our highly competitive trade prices.

Product Features

- Long life Duplex stainless steel cylinder
- Choice of capacities from 120 to 300 litres
- Purpose designed solar coil for maximum efficiency
- Indirect auxiliary heating with immersion back up
- Main pressure unvented hot water for high power showers and rapid filling baths
- Lower running costs and lower carbon emissions
- Ideal for both refurbishment and new build projects

- A complete package with all safety and hot water controls included
- 25 year cylinder leak guarantee
- 2 year guarantee on all other parts.
